WHERE WE ARE	97

Legurme transforms the harvests of Anatolia into healthy, modern foods enjoyed worldwide. With innovative recipes, clean labels and trusted production, we share a new perspective for a colourful life...

Natural, delicious and full of goodness.

30 Years of Expertise. One Global Vision.

With 30 years of experience in rice, pulses and value-added food categories, Yayla Agro Gıda is a leading manufacturer combining scale, technology and innovation to deliver reliable food solutions worldwide.

1 Million Tonnes of Annual Capacity.

Operating from Ankara, Mersin and Niğde, Yayla serves 80+ countries worldwide, supported by a strong and well-established distribution network.

From Türkiye to the World.

Through its global brand Legurme, Yayla delivers diverse, globally inspired food solutions to international markets, growing steadily every year.

Built on Quality. Driven by Innovation.

Responding to changing consumer habits, Yayla develops high-quality, safe and innovative products guided by its belief: “Building a Better Future.”

Investing in Tomorrow.

Yayla’s next milestone is the Niğde Production Facility, launching in 2025 on a 127,000 m² site with 160,000 m² closed area, designed for high value-added production.

Food for the Next Generation.

The Niğde facility will focus on innovative, value-added and future-ready food solutions, designed to meet modern lifestyles and evolving consumer expectations.

Sustainable. Innovative. Global.

With advanced technology and a sustainability-driven mindset, Yayla Agro Gıda continues to shape the future of food.

2023

2024
Received the Gold Award in packaging in 3 different categories at the Moon Stars of Packaging award ceremony.

ISO 500 Ranked 258th.
Fortuna 500 Türkiye Ranked 257th.

Legurme brand has been selected to be part of the Turquality global brand development program by Turkish government.

Niğde factory has started production.

2025

Who We Are

As Yayla Agro, we are a global food company dedicated to developing and manufacturing high-quality, value-added food solutions with a strong focus on innovation, quality and sustainability. Through our advanced production capabilities and robust product development approach, we deliver reliable and scalable solutions to both domestic and international markets.

Our global brand Legurme reflects this vision by offering modern, convenient, and clean-label products designed for today's lifestyles, making healthy living more accessible worldwide while combining functionality, taste, and trust.

OUR VISION
Becoming a leading brand in Turkey and globally in the basic food category, producing healthy innovative products in line with changing consumer and consumption habits.

OUR MISSION
In order to build a healthier future; to be a brand that produces value-added products in the basic food category from the soil to the dining tables with an innovative, principled and customer-oriented approach, and offers them to the end consumer at an accessible price through all sales channels.

OUR PRINCIPLES
Having the responsibility and awareness of being a social brand; to work with all our assets to improve all processes and add value to our world, our land and future generations, which are deteriorating day by day.

OUR VALUES
Customer Satisfaction
Reliability
Innovation
Transparency Efficiency
Respect for Human and Environment
Ethical Working Principles

WHY US?

Has a strong financial background and become successful public company

Standing out as a market leader in the industry

Fast, reliable service supported by high production capacity and strong logistics capabilities

Providing private label solutions and custom production capabilities

Placing great importance on R&D and factory investments

Understanding of market needs and highly responsive

Offering reliable products up to global certification standards

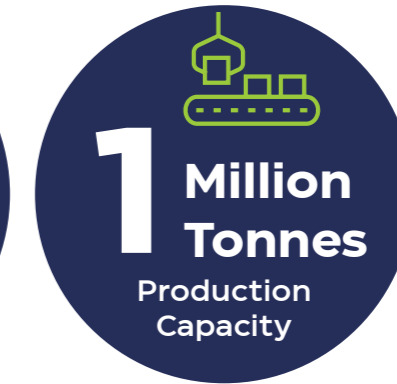

Committed to eco-friendly production and packaging guided by sustainability

Experience Shaped by Nature

Strength from the Past,
Innovative Steps Forward

Where Progress Matters

Pioneering R&D Leadership in the Value-added Products Industry

As the holder of **Türkiye's first and only R&D Centre Certificate in the rice and legumes segment**, Yayla Agro underscores its unwavering commitment to innovation and sustainable growth. Our newly established, modern R&D Centre - designed around the needs of our employees and business partners - enhances both workplace well-being and project efficiency, strengthening our role as a sector-leading innovator.

Our R&D department quickly responds to market demands by developing innovative products. We enhance existing products to improve quality, explore regional tastes, and introduce unique local flavors. These processes are strategic steps that increase customer satisfaction and strengthen our brand's competitive edge.

Certified for Excellence

Our strategic focus on Quality and Food Safety is reinforced by internationally recognized certifications and standards across global markets.

Empowering Global Private Label Partnerships

We deliver **tailored private label solutions** supported by strong production capabilities and deep category expertise. Our flexible, customer-focused approach ensures reliable, high-quality products designed to meet diverse market needs.

Responsible at Every Step for a Sustainable Future

We continue to build a more sustainable tomorrow. By generating our own renewable energy, minimizing environmental impact and striving toward Zero Waste through sustainable practices that optimize resource efficiency, we act with purpose to protect our planet.

Guided by our commitment we aim to become carbon neutral by 2050.

FREEZE DRIED PRODUCTS

WE PRESERVE THE ORIGINAL FLAVORS

FREEZE DRIED PRODUCTS

Freezing Nature, Locking the Flavor in...

Freeze-dried fruits and vegetables retain their natural flavor, nutrients, and texture by removing moisture through a precise freezing and vacuum process, resulting in lightweight, shelf-stable products with preserved freshness and quality.

ADVANTAGES

Freeze-Dry Technology

Freeze-drying is a process in which products are rapidly frozen and the water is removed through sublimation under vacuum. This advanced method preserves the product's nutritional value, natural aroma, and vibrant color while significantly extending shelf life.

It is particularly effective for heat-sensitive foods and pharmaceutical applications. By eliminating the need for additives or preservatives, freeze-drying maintains the original taste, texture, and nutritional integrity of the product.

RICE & MULTIGRAIN SNACKS

**LIGHT BITES,
BIG SMILES**

RICE & MULTIGRAIN SNACKS

Naturally Light, Deliciously Nutritious!

Pulses, grain, and rice cakes are made by puffing or pressing grains, legumes, and rice under high heat to create a light, crunchy texture, offering a nutritious, low-calorie snack that is rich in fibre and protein.

ADVANTAGES

Rice cakes offer an ideal alternative to any meal or snack, perfect for both sweet and savory dishes. **Tailored to Your Needs:** Rice cakes are a healthy alternative to bread, both light and versatile. **Nutritiousness Through Simplicity:** Produced using a special popping method that preserves the natural nutritional value and flavor of legumes and grains.

BONE & VEGETABLE BROTH

WARM UP
POWER ON

BONE & VEGETABLE BROTH

Wellness Begins in Every Sip

Bone and vegetable broth provide nutrient-dense hydration with vitamins, minerals, and natural healthy fats that support overall wellness. Rich in collagen for joint health and gentle on digestion, they also deliver antioxidants that help strengthen the immune system and contribute to natural detoxification, offering a soothing and functional option for everyday nourishment.

PRODUCT RANGE

ENRICHMENT OPTIONS

Various Halal Meats and Bones,
Various Vegetable Varieties (Carrots, Onions, Broccoli, etc.),
Flavor-Enhancing Spices (Bay Leaves, Black Pepper, Red Pepper, and Cloves, Turmeric, Ginger, Lemon etc)

ADVANTAGES

Nutrient-Dense: Rich in vitamins, minerals, and healthy fats, supporting overall wellness.

Supports Joint Health: Bone and marrow juices are known for their collagen content, promoting joint health.

Immune Boosting: Vegetable juices offer antioxidants that strengthen the immune system.

Digestive Aid: Helps with digestion due to high collagen and nutrient content.

Detoxifying: Some juices help detoxify the body by flushing out toxins.

TVP TEXTURED VEGETABLE PROTEIN

**PLANT-BASED
POWER
FOR REAL LIFE**

TVP

TEXTURED VEGETABLE PROTEIN

More Protein, More Possibilities

Textured vegetable protein provides a versatile plant-based option that can be used as a meat alternative, a protein boost, or a way to enrich meat in recipes, naturally low in fat and cholesterol, it delivers essential vitamins and minerals while supporting balanced nutrition. Suitable for vegan patties, sausages, sauces, and everyday dishes, it offers an adaptable and budget-friendly solution without compromising taste or texture.

-  VEGAN
-  GLUTEN FREE
-  ADDITIVES FREE

GLUTEN-FREE PULSE & CEREAL FLOUR

**MORE
POSSIBILITIES
IN EVERY MIX**

GLUTEN-FREE PULSE & CEREAL FLOUR

Smart Flour for Modern Foods

Gluten-free pulse flour is made from nutrient-rich pulses and offers a clean-label alternative for both industrial production and in-house use. Suitable for breads, baked goods, pasta, noodles, snacks, and high-protein bars, it supports vegan and gluten-free applications while enhancing texture and nutritional value in sauces, soups, dairy products, and desserts.

ADVANTAGES

- Naturally Gluten-Free:** Provides a clean and reliable alternative for gluten-sensitive and vegan product formulations.
- High in Protein and Fibre:** Supports balanced nutrition and contributes to improved satiety in both baked goods and snack applications.
- Enhances Texture and Structure:** Improves dough stability and product consistency in breads, pasta, noodles, and confectionery without synthetic additives.
- Versatile Across Applications:** Suitable for industrial production and in-house use, performing well in snacks, high-protein bars, sauces, soups, dairy products, and desserts.
- Clean-Label Ingredient:** Made from nutrient-dense legumes, offering a simple ingredient declaration aligned with modern consumer expectations.

STARCH-RICH FLOURS

**THE SCIENCE
BEHIND
PERFECT TEXTURE**

STARCH-RICH FLOURS

Functional Starch for Superior Structure.

Starch Rich Flour is a high-starch functional ingredient designed to optimize structure, texture, and processing performance across diverse food applications. Produced from corn, rice, chickpea, lentil, oat, and pea, it supports sauces, soups, pasta, noodles, and extruded snacks by improving consistency, expansion behavior, and moisture management. Developed for industrial use, it ensures reliable texture, product stability, and shelf-life performance.

VEGAN

GLUTEN FREE

ADDITIVES FREE

PRESERVATIVES FREE

PRODUCT RANGE

STARCH-RICH FLOURS

Chickpea, Lentil, Pea

ADVANTAGES

Product volume increases because during starch gelatinization, starch absorbs water and forms a porous structure.

A soft and light texture is achieved because a high amylopectin content creates an elastic internal structure.

Crispy and crunchy product production is supported because a low protein content prevents the formation of hard and rubbery textures.

High expansion in extruded products occurs because starch cooked under pressure expands rapidly when exiting the die.

High water holding capacity is provided as starch granules swell with heat and bind free water.

Shelf life is improved because moisture balance is maintained and staling caused by retrogradation is delayed.

CAPACITY & MACHINE LINE

3.500 kg per hour

PULSES PROTEIN CONCENTRATES

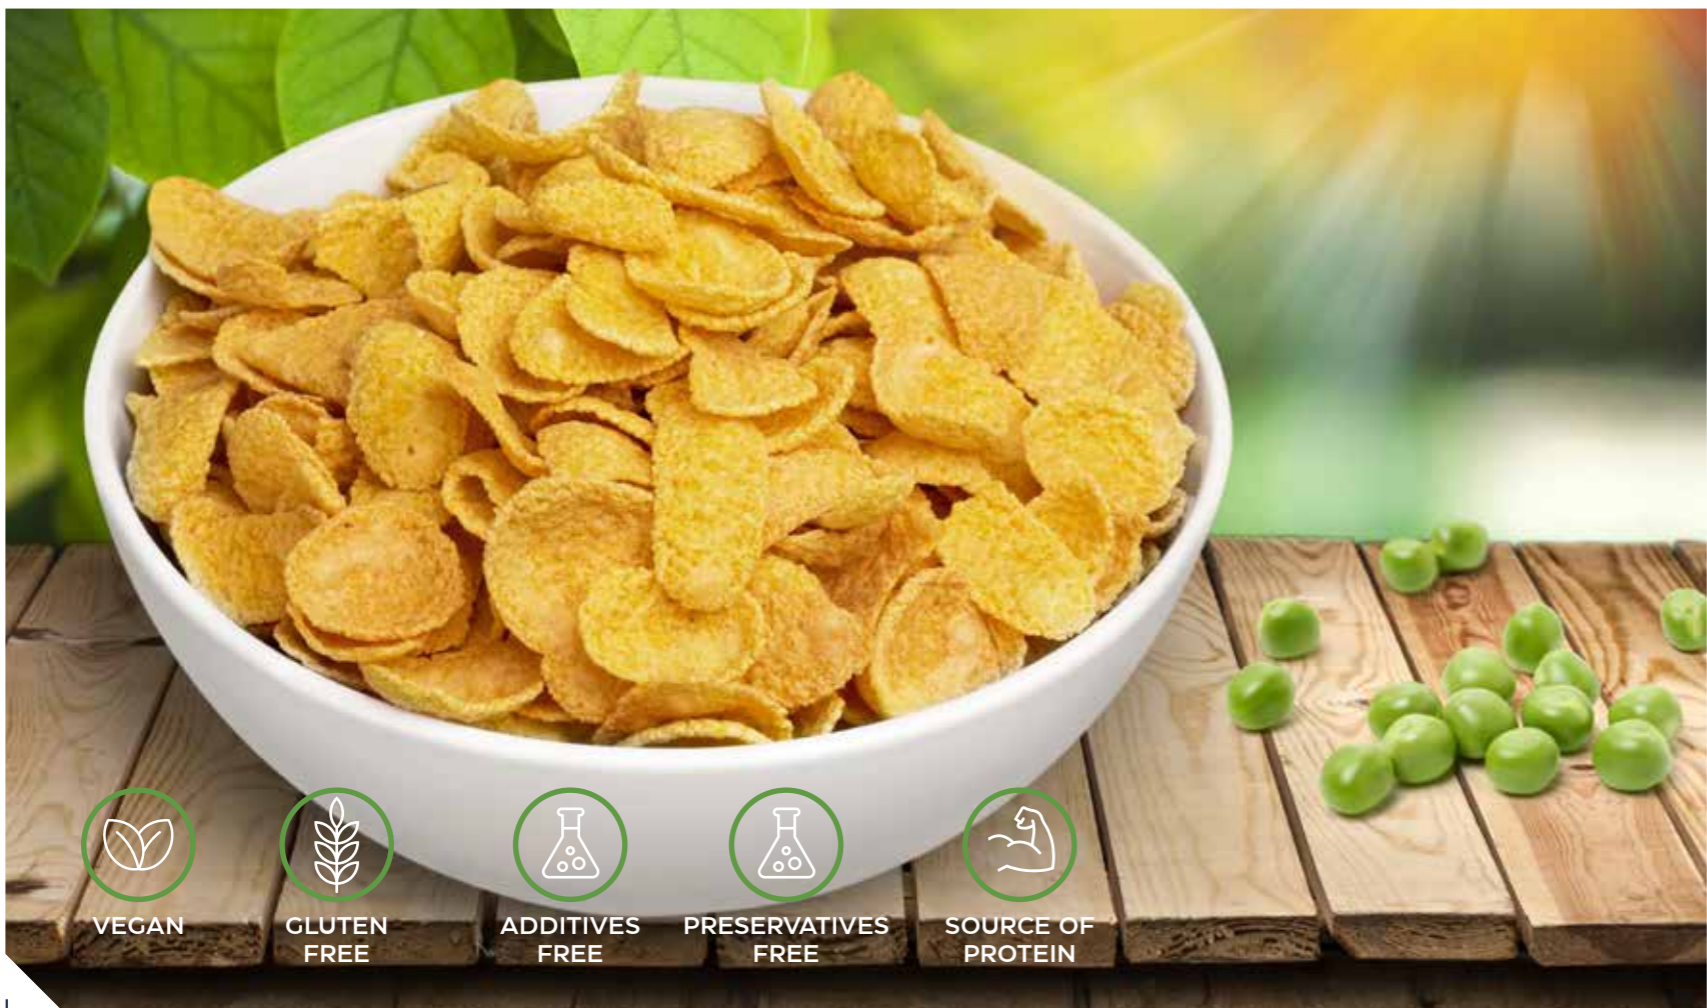

**PLANT-BASED
PROTEIN
EXCELLENCE**

PULSES PROTEIN CONCENTRATES

Your Shortcut to Gourmet Cooking

Pulse Protein Concentrates are functional ingredients derived from legumes, containing 55–70% protein with reduced starch and fibre content. They are used to provide protein enrichment, binding, and structural support in food formulations, delivering consistent performance across demanding processing conditions.

PRODUCT RANGE

PROTEIN-RICH FLOUR AND STARCH

Peas, Chickpeas, Lentil

ADVANTAGES

With a high protein content, it increases the nutritional value of food products.

It provides binding properties, supporting structural integrity especially in gluten-free formulations.

Through protein denaturation induced by heat, it forms a stable and durable structure in finished products.

It is resistant to extrusion and cooking processes, delivering consistent and repeatable product quality.

Being plant-based and naturally gluten-free, it is suitable for vegan products and formulations designed for allergen-sensitive consumers.
